

SC-TAB10-IPAD

Automation Tablet

Model Number:#09090045

Features

- 10.9" Touch screen control panel
- Resolutions 1280 x 800 pixel
- Aspect ratio 16:10
- 1 GB POE Network port
- Desktop / Table-top
- Support POE function (802.3af Class 3)

Product Overview

The 4TheWall IOS Touch Screen Control Panel is a high-performance control interface designed to enhance interactive control and management in various professional environments. Built on a powerful A14 Bionic chip architecture and running the IOS operating system, this touch screen panel offers superior processing capabilities, extensive memory, and storage, making it an ideal solution for multi-media conference rooms, multi-functional halls, training centers, exhibition centers, broadcasting studios, and more.

- **A14 Bionic Chip:** Powered by a high-performance A14 processor ensuring fast and responsive operation for demanding applications.
- **High-Capacity Memory and Storage:** Equipped with 64GB storage.
- **IOS Platform:** Runs on the latest IOS operating system, offering a familiar and user-friendly interface with enhanced security features and performance improvements. This makes it easy to use and highly adaptable for various control and automation tasks.
- **Versatile Usage Scenarios:** Suitable for use in multimedia conference rooms, multi-functional halls, training centers, exhibition centers, broadcasting studios, and more, where interactive control and management are crucial.

Applications

- **Multimedia Conference Rooms:** Ideal for controlling AV equipment, lighting, and other systems in a multimedia conference setting, enhancing interactivity and efficiency.
- **Multi-Functional Halls:** Perfect for managing various control elements, such as lighting, sound, and visual systems, in multi-functional event spaces.
- **Training Centers and Exhibition Halls:** Provides an intuitive and powerful interface for managing presentations, interactive displays, and other training or exhibition equipment.
- **Broadcasting Studios:** Suitable for controlling and managing broadcast equipment, enabling streamlined operation and content management.
