

SC-50/7 21.5 Motorized Retractable Monitor

Model Number:3112251262

Elegance Meets Performance — For the Modern Meeting Space

The **SC-50/7 21.5** is a premium line of **motorized retractable LCD monitors** designed to bring elegance, functionality, and cutting-edge technology into high-end meeting rooms, boardrooms, control rooms, and training centers. With **Full HD resolution**, **ultra-slim profile**, and **quiet motor operation**, these displays provide a clutter-free, flexible, and modern solution for digital collaboration.

SC-50/7 21.5 series supports HDMI (Optional 2XHDMI), USB, and RS232/RS485 connectivity, making it a perfect fit for both AV and automation systems.

Automation Ready

SC-50/7 21.5 monitor is fully compatible with modern automation and control systems.

Seamless integration is available with:

- **Control Path** automation software
- Room-wide **AV system management**, including lights, blinds, air conditioning, and sound systems

They are also designed to operate with **MC24 Automation Control Unit**, **SC-TAB** series touch panels, and **4TheWall Conference Automation Suite** — offering centralized or touch-based control with customizable user interfaces.

- Motorized lift with silent actuator
- Tilt angle: 0–30°
- Touchscreen option
- Brushed aluminum panel
- Available in black or silver finishes
- Hidden cable management

Elevate Your Meeting Room Experience

The **4TheWall Motorized LCD Monitor Lift** is a cutting-edge solution designed for modern meeting and conference environments. With seamless integration into office furniture, this lift system transforms hidden displays into powerful tools for communication, control, and collaboration.

Key Features:

- **Advanced Hidden Lift Mechanism:**

Fully motorized system designed to **raise and lower monitors vertically** from the conference table surface with a single touch or via external control systems.

- **Automatic Power Management:**

The monitor **powers off when retracted** and **automatically powers on when raised**, ensuring energy efficiency and longer device life.

- **Wide Range of Screen Sizes:**

Available in multiple display sizes including:

- 13.3", 15.6", 17.3", 18.5", 21.5", and 23.8".
- **23.8" version supports full 4K UHD resolution** for crystal-clear visuals.

- **Slim Design, Full Performance:**

The entire mechanism has an ultra-thin **thickness of just 7 cm**, ensuring minimal impact on table design while maximizing functionality.

- **Adjustable Viewing Angle:**

Smooth one-way tilting of the screen **up to 30°** for ergonomic viewing.

- **Quick Operation:**

Monitor rises in just **15 seconds**, providing instant access to display functionality.

Screen Border Thickness:	Screen Frame Thickness:
13.3" – 6.7 mm	13.3", 15.6", 17.3" – 8 mm 18.5" – 10 mm 21.5" – 16 mm 23.8" – 18 mm
15.6" – 6.3 mm	
17.3" – 6.6 mm	
18.5" – 8.2 mm	
21.5" – 6.3 mm	
23.8" – 6.0 mm	

Key Features

- ▶ 7cm slim design with HD screen, available for 13.3 inch, 15.6 inch, 17.3inch, 18.5 inch, 21.5 inch and 23.8 inch.
- ▶ Solid mechanized aluminum brushed hosing in anodized finishing.Upper cover plate in brushed aluminum alloy.
- ▶ 12V step motor with simultaneous drive for multiple movements.
- ▶ Electric powered lift system with variable speed, Vertically silent Operation.
- ▶ Custom Color aluminum anodization. LCD monitor lift is available for aluminum silver, black matte, aluminum gold, oxidation titanium.
- ▶ Desk LCD monitor lift provides protecting function of HD screen monitor by cutting electricity off automatically if reach the monitor lift bottom and powering screen on if reach the top.
- ▶ Screen of motorized monitor lift angle adjustable available from 0 degree to 30 degree as required.
- ▶ Touch switch on top panel, RF remote control which come with monitor lift mechanism; RS232 button with input; control all screen up and down together at the same time.
- ▶ Display screen:English operation menu(set up screen brightness&color) .
- ▶ Anti accident system for hand protection and Anti collision machine design.
- ▶ 1.8mm panel does not require countersunk holes.
